

## Driving License, Operators License and OCRS

This course is approximately 3.5 hour long, Driver Link Training have created this course with the idea of using the Qwizdom system which is integrated within the course for a more enjoyable experience. This course is designed to explain the changes made to new and existing driving licenses. It advises drivers about the consequences of their actions for the operator, or when they receive a fixed penalty notice, Prohibition or other conviction for an offence, whilst in the company vehicle. It then shows how the system is used to score any offences and how this can also affect all drivers at the company.

Qwizdom is an award-winning developer of interactive learning solutions that enhance presentation deliverability and user engagement. Driver Link Training have the exclusivity to use Qwizdom, KGS Recruitment Services are an approved consortium member so it stretches out to them. The Qwizdom has become a useful learning tool, which will enable the course delegates to get the best out of the course.

However, there will be time for questions to be asked during the course, if you want to know more.
